〔 I 〕 次の英文を読み、後の問いに答えなさい。

Nita was recently married and had started living in a joint family with her husband and *in-laws. After a few days, she started to realize that she is not able to get along with her mother in law. Nita's mother in law was conservative (1) Nita was liberal with modern lifestyle. Soon they both started quarreling due to differences in opinions and lifestyles. As days and months passed, neither of them changed their behavior.

Nita became very aggressive over the time and started to hate her mother in law. She started to think about how to get rid of her mother in law.⁽²⁾ Once, as usual, when she quarreled with her mother in law and her husband took his mother's side, she became angry and left to her father's home. Nita's father was a chemist and she told him about everything that's been happening. Then she pleaded with her father that give her something poisonous, so she can mix it up and give it to her mother in law to get rid of her, else she won't go back to her husband's home.

Nita's father felt pity at her situation but told her, "If you give poison to your mother in law, you and I both will end up in jail."⁽³⁾ It is not the right thing to do". But, Nita was in no mood to listen and understand. Finally, her father gave in. He told her, "OK, as you wish but I don't want to see you in jail, so do as I tell you". Nita agreed. Her father brought a powder and told her, "Every day when you make lunch or dinner, just mix a little pinch of this powder in your mother in law's meal, since the quantity will be less, she won't die quickly but will slowly in few months and people will think she has died naturally".

He also told her, "Because no one should have doubt on you, from today onwards, you will not fight at all with your mother in law but instead you will be very caring towards her, (4) she says something which you don't like, you will not be rude, you will simply be polite only". Nita agreed thinking she will be free from her mother in law's quarreling in few months and came back to her in-laws and as advised by her father, she started mixing the powder in her mother in law's meals and behaved very caring and polite whenever her mother in law said something.

As time started to pass, Nita's mother in law's nature also started to change. Because Nita was being very caring towards her, she too started to be affectionate towards her.⁽⁶⁾ Five months passed and Nita had been mixing the powder but atmosphere of the house was changed. There were no quarrels, both were praising each while talking to neighbors. They got very attached to each other like a mother and daughter. Now, Nita started to get worried thinking due to the powder, her mother in law may die soon.

She ran at her father's home and told him, "Dad! Please give me the *antidote to cure the effect of that poisonous powder you gave! I don't want to lose my mother in law, she is just like my mom and I love her very much". Her father smiled and said, "Which poison? I had simply given you a sweetener!"

〔 II 〕 次の英文の内容と合っているものを後の文から5つ選び、番号で答えなさい。

〔解答番号は ~ 〕

Feeling a bit down or under the weather? It might be time for a trip to see some fine art.

Doctors in Montréal, Canada will be able to write a *prescription for a trip to *the Montréal Museum of Fine Arts (Musée des Beaux-Arts de Montréal) as an addition to *conventional treatment. Physicians who are a member of the organization *Médecins Francophones du Canada will be able to issue 50 prescriptions to the museum starting on 1 November. That means patients, accompanied by family or caregivers, can enjoy the benefits of art on a free visit.

This isn't the museum's first *foray into the connection between art and wellness. The museum is home to the Michel de la Chenelière International Atelier for Education and Art Therapy, an educational complex filled with health and art therapy programming for people of all ages. The museum has had researchers from a variety of institutions in Quebec study the beneficial aspects of visiting the museum and whether it is comparable to the benefits of physical exercise.

According to the museum, this is the first initiative of its kind in the world and is designed to assist people with physical and mental health problems. The program welcomes people into a relaxing and revitalizing setting, where they can rest and even strengthen their connections with loved ones.

"I am convinced that in the 21st century, culture will be what physical activity was for health in the 20th century. Cultural experiences will benefit health and wellness, just as engaging in sports contributes to fitness. Sceptics would do well to recall that just a hundred years ago, sports were believed to distort the body and threaten women's fertility," said Nathalie Bondil, director general and chief curator of the MMFA, said in a statement. The doctor's association also notes that the program coincides with their efforts to recognize the "individuality and humanity" of patients.

If you want to experience the health benefits of the museum yourself, head there to see works from European masters like Rembrandt, Picasso and Monet, and an incredible collection of Canadian art.
